Antitrust Policy Notice

- Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

- Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at http://www.linuxfoundation.org/antitrust-policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

THE LINUX FOUNDATION

Agenda

- Reminder:
  - TSC call for nominations is out
    - Submission deadline: Friday June 15
    - submit nomination and CV via email to: tsc-nominations@OpenHPC.groups.io
  - ISC is June 24-28th, we will have a booth
- Welcome new academic members
  - University of New Mexico
  - New Mexico Consortium
- v1.3.5 release
  - update on current status

v1.3.5 Update: CentOS7.5

- Based on discussion from last time, updated our CI test environment to use CentOS7.5 SMS images for both x86_64 and aarch64
  - docs updated accordingly
  - also completed builds for a number of components with newer versions available
  - expecting a new SLURM release soon to address CVE
- File system issues:
  - Lustre client observed to not consistently mount on boot using existing fstab settings
    - Updated our standalone Lustre server to use latest 2.11.0 release, but didn't observe any difference on client mount
    - Testing an updated approach that leverages systemd automount…looks to work fine in our CI environment

Old: `172.17.1.16@o2ib:/ltest /mnt/lustre lustre defaults,_netdev,localflock,retry=2 0 0`

New: `172.17.1.16@o2ib:/ltest /mnt/lustre lustre defaults,localflock,noauto,x-systemd.automount 0 0`

  - We also observed driver build failures with BeeGFS against CentOS7.5
    - patch is available to support 7.5
    - patch usage added to current install recipe, but new BeeGFS version just released; looking into using latest version

v1.3.5 Update: CentOS7.5

- WIP
  - failure on aarch64 is Singularity….test update needed to access newer 7.5 distro
  - 2 test failure(s) on x86_64 related to BeeGFS client mounts

- Plan: finalize all builds this week; final manifest/doc updates next week; target release for end of next week.
