

Meeting of the Technical Steering Committee (TSC) Board

Tuesday, June 12th 2018
11:00am ET

Meeting Logistics

- https://www.uberconference.com/jeff_ef

- United States : +1 (510) 224-9559 (No PIN needed).

Antitrust Policy Notice

- Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

- Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at http://www.linuxfoundation.org/antitrust-policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

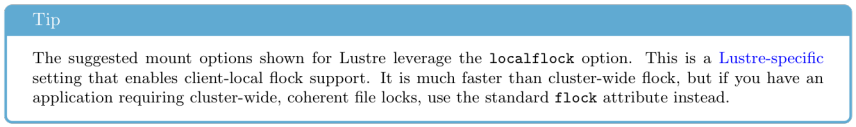

THE LINUX FOUNDATION

Agenda

- Reminder:
  - TSC call for nominations is out
    - Submission deadline: this Friday, June 15
    - submit nomination and CV via email to: tsc-nominations@OpenHPC.groups.io
  - ISC is June 24-28th, we will have a booth
- v1.3.5 release
  - update on current status
- possible submission to LF Open Source Summit
- .spec file changelog discussion

v1.3.5 Update: CentOS7.5

- Updates from last time:
  - ✓ use of localflock with Lustre tooltip added
  - ✓ BeeGFS patch applied in recipe for use with CentOS7.5
  - ✓ singularity test updated for CentOS7.5
  - ✓ charliecloud added to test-suite
  - ✓ new SLURM version (17.11.7) came out May 30 to address CVE-2018-10995. Latest build now included for v1.3.5
  - ✓ tarball repo testing enabled in CI
- Remaining items:
  - we are getting close to finalizing the v1.3.5 release, CI results looking good
  - did catch a few previous package variants that did not get rebuilt with the new dependency conventions over the weekend
    - trilinos with openmpi1 was one of them which takes a while to build (18.8 hours on aarch)
    - plan to finalize these rebuilds and push release out this week

v1.3.5 Update: CentOS7.5

- Current CI snapshot:

1.3.5 Release

Release expected to go out this week:

- no new recipes
- support for CentOS7.5
- rebuilds old compiler/MPI variant packages to include the dependency convention change for dynamic libraries installed into /opt/ohpc/pub we intruded in v1.3.4 release
- adds 1 new component and number of component version updates (43.8%)

Updated history of component growth and version updates:

Linux Foundation Open Source Summit

- https://events.linuxfoundation.org/events/open-source-summit-europe-2018/
  - October 22-24
  - Edinburgh, UK
- Call for Proposals
  - https://events.linuxfoundation.org/events/open-source-summit-europe-2018/program/cfp/
  - Dates to Remember:
    - CFP Closes: Sunday, July 1, 2018
    - CFP Notifications: Monday, August 13, 2018
    - Schedule Announcement: Tuesday, August 14, 2018
    - Slide Due Date: Monday, October 8, 2018
  - You will need to choose a session type when submitting:
    - Session Presentation – Typically 50 minutes in length
    - Panel Discussion– Typically 50 minutes in length. Again, all panelist names must be included in the submission, and all-male panels will not be considered.
    - Birds of a Feather – Typically run in the evenings as an unconference style working session with audience participation, and are 1 hour in length.
    - Lightning Talks – Typically 5 minutes in length and run the day before the event or during the event itself.
    - Tutorial– Deep dive of content, 1.5 – 2 hours in length
    - Lab – Typically 3-4 hours with hands-on work

.spec file %ChangeLog

- RPM .specs have a %changelog section
- Intended to document changes to the build/packaging, not a changelog for the underlying software
- To date, we have not been consistent on populating this section:
  - some .spec files have limited entries
  - others do not

```
%changelog
* Tue May 23 2017 Adrian Reber <areber@redhat.com> - 3.0-2
- Remove separate mpi setup; it is part of the %%ohpc_compiler macro

* Fri May 12 2017 Karl W Schulz <karl.w.schulz@intel.com> - 3.0-1
- switch to use of ohpc_compiler_dependent and ohpc_mpi_dependent flags

* Wed Feb 22 2017 Adrian Reber <areber@redhat.com> - 3.0-1
- Switching to %%ohpc_compiler macro
```

- Note that we rely on GitHub for revisioning all of the .spec files so the authoritative history is owned by git
- Question: do we want to possibly adopt some standards for this section of the .spec?
  - Option #1: require entries in this area and agree on what types of changes should get logged (e.g. would folks want to see an entry when the version # is increased, etc)
  - Option #2: leave this section blank and simply rely on git for analysis of historical changes
