

Meeting of the Technical Steering Committee (TSC) Board

Tuesday, July 10th 2018
11:00am ET

Meeting Logistics

- https://zoom.us/j/556149142

- United States : +1 (646) 558-8656
  - Meeting ID: 556 149 142

Antitrust Policy Notice

- Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

- Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at http://www.linuxfoundation.org/antitrust-policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

THE LINUX FOUNDATION

Agenda

- TSC selection for 2018-2019 is complete:
  - welcome new members!
    - Chris Downing, Red Oak Consulting
    - Chris Simmons, UT Dallas
    - Michael Karo, Altair
    - Takayuki Okamoto, Fujitsu
    - Kevin Pedretti, Sandia National Laboratory
    - Paul Peltz, Los Alamos National Laboratory
  - administrative note: TSC meeting slides get posted on github wiki:

    https://github.com/openhpc/ohpc/wiki/Technical-Steering-Committee-Meetings
  - first item of business: collect nominations for Project Lead
    - current TSC nominations: please send nominations for Project Lead to Jeff by Wednesday July 18, 2018
    - propose to complete voting by Monday, July 30, 2018.
- Follow up from previous meetings:
  - ✓ %changelog sections in .spec files have been wiped out on v1.3.6 branch
  - ✓ gcc 8.1 initial builds look ok, proceeding further with gcc8 variant

- Delimiter addition to RPM release string
- SC'18 BoF submission
- Review Cycle
- Updated access stats
- Hyperion Research draft question review

Follow up: Adding ohpc delimiter to package release numbering

- Recall from previous discussion on RPM release numbering:
  - by default, OBS takes ownership of managing the release tag numbering (it bumps it up when there are source changes or when an upstream package change triggers a rebuild)
  - Release: <CI_CNT>.<B_CNT>
- Have tested updating the schema in OBS to append string of our choosing that maps to a given release branch:

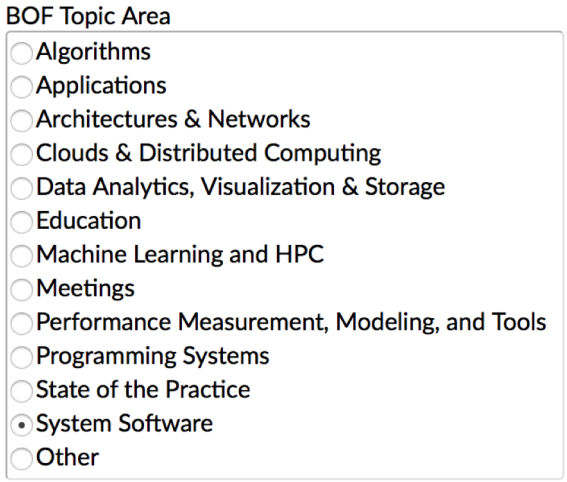

```
# Add release tag attribute
Release: <CI_CNT>.<B_CNT>.ohpc.1.3.6
```

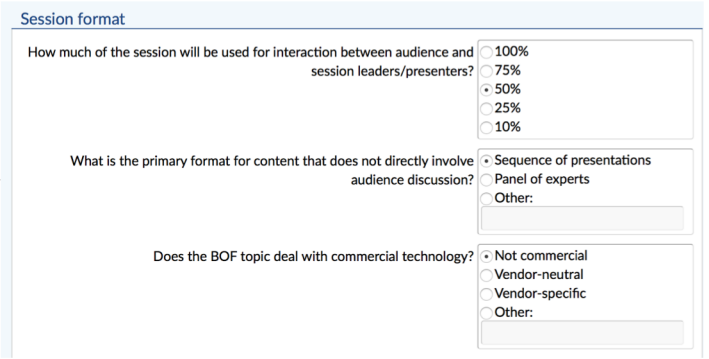

- Confirm we are content with resulting RPM name examples as follows (release strings highlighted in orange):

mpich-gnu8-ohpc-3.2.1-6.1.ohpc.1.3.6.x86_64.rpm
ohpc-warewulf-1.3.6-2.1.ohpc.1.3.6.x86_64.rpm
ohpc-slurm-server-1.3.6-2.1.ohpc.1.3.6.x86_64.rpm
gnu8-compilers-ohpc-8.1.0-8.2.ohpc.1.3.6.x86_64.rpm
openmpi3-gnu8-ohpc-3.1.0-7.1.ohpc.1.3.6.x86_64.rpm

SC'18 BoF Submission

- Submissions are due July 31, 2018
- What we need:
  - Title: OpenHPC Community BoF
  - Additional Session Organizers:
  - Topic Area
  - Session Format
  - Amount of Time Requested
    - 1 or 1.5 hours?
  - Expected Attendance
    - 150
  - Keywords (3):
    - system administration, community HPC stack, development/runtime environments
  - Abstract (100 words), Long Description (500 words)
    - propose to reuse what we had last time….

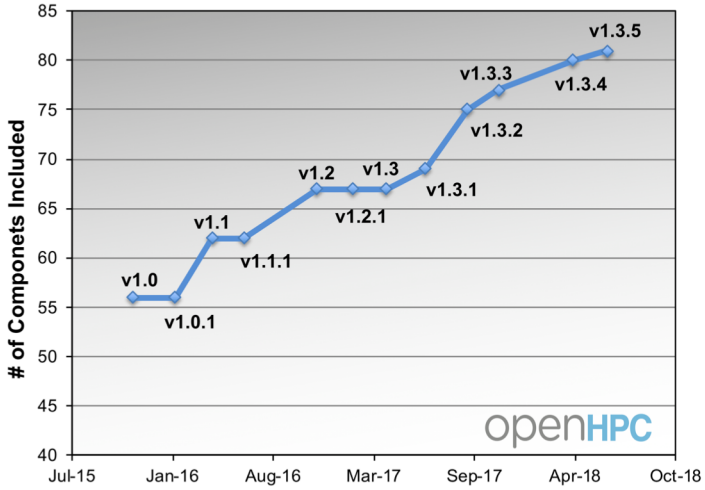

Review Cycle #7

- The deadline for next round of submissions just passed on July 6th
- Overview of process for new TSC members:
  - we have been reviewing submissions on a roughly quarterly basis
  - separate github repo for taking community requests:

    https://github.com/openhpc/submissions
  - minimum of 5 reviewers needed per submission
    - component development reps
    - end-user site reps
    - at least 3 others
  - process overview:

    https://docs.google.com/document/d/1po_yd-QvZJSIXYZ0fRo-IqyoQQIJkBQiQVqzilG-Tsw

- Normally, this would be the time when we would ask for review volunteers, however this is the first review cycle in which there were no new submissions
- Next submission deadline? September 30, 2018

Hyperion Research – OpenHPC survey

- Recall from previous meetings the intent to initiate an OpenHPC focused survey with Hyperion Research
- TSC and others submitted some draft motivation/questions and governing board approved funding to move forward with a "pulse study"
  - Respondents should be able to complete the q'aire in about 10 minutes.
  - No open-ended questions, with rare exceptions
- Have now received first draft of questions
  - let's walk thru and I can take feedback to group coordinating with Hyperion
  - my initial take is that it doesn't include much of the specific technical questions we highlighted; believe there is room for 5-6 more questions….

OBJECTIVES

Better understand:

- OpenHPC ***users***
- OpenHPC ***awareness*** (extent, depth) and ***perceptions***
- OpenHPC ***usage*** and ***satisfaction***
- OpenHPC ***preferences*** for the future

TARGET RESPONDENTS:

- HPC data center managers
- HPC users
- HPC OEMs

Hyperion Research – OpenHPC survey (draft)

Q1: Does your organization (or those you sell to) use or sell high performance computing (HPC) server systems, either on premise on in a public cloud environment?

a. Yes [GO TO NEXT QUESTION] →
b. No [END SURVEY / THANK RESPONDENT]
c. Not sure/don't know [END SURVEY / THANK RESPONDENT]

Q2: Which of these categories best describes your own role?

a. HPC data center manager or staff member
b. Government user
c. Industrial/commercial user
d. Academic user
e. HPC system vendor (OEM)
f. Other

why is this "USERS ONLY"?

Q3: (USERS ONLY) Which market segment best fits your organization?

a. Academia/university
b. Bio-science/healthcare
c. Commercial business (enterprise IT)
d. Computer-aided design (CAD)
e. Computer-aided engineering (CAE)
f. Digital content creation & distribution
g. Electronic design & analysis (EDA)
h. Financial services
i. Geosciences
j. Government labs/research centers
k. National defense
l. Weather forecasting/climate modeling
m. Vendor-hardware
n. Vendor-software
o. Not sure/don't know

Q4: Where does your organization (or those you sell to) use HPC systems?

a. Only on-premise
b. Only in a public cloud
c. Both on-premise and in a public cloud
d. Not sure/don't know

Q5: What is the largest HPC server system your organization (or those you sell to) has access to? (Choose ONLY ONE)

a. Small cluster (<100 nodes)
b. Medium cluster (100-1000 nodes)
c. Large cluster (>1000 nodes)
d. Not sure/don't know

Q6: Which type of CPU is preferred by your organization (or those you sell to)? (Choose ONLY ONE)

a. x86-64
b. aarch64
c. ARM64
d. IBM POWER
e. Other
f. Not sure/don't know

??? pick one

sites may have multi, do we want to know what they are interested in supporting, or what they prefer?

Q7: Which operating system is preferred by your organization (or those you sell to)? (Choose ONLY ONE)

a. CentOS ~~or other open-source Linux distribution~~
b. Red Hat Enterprise Linux (RHEL)
c. SUSE Linux Enterprise Server (SLES)
d. Windows
e. Other
f. Not sure/don't know

perhaps identify Debian based distro?

Hyperion Research – OpenHPC survey (draft)

Q8: How familiar are you with OpenHPC?
a. Very familiar
b. Somewhat familiar
c. Not familiar at all

Q9: In your opinion, which of these phrases best describes OpenHPC? (Choose ONLY ONE)
a. An open-source operating system
b. A collection of open-source software for deploying and managing clusters
c. An open-source job scheduler
d. Not sure/don't know

Q10: How important is it for OpenHPC to exist?
a. Very important
b. Somewhat important
c. Somewhat unimportant
d. Very unimportant
e. No opinion

Q11: What do you think is the status of OpenHPC today?
a. Not available yet
b. Available but not very comprehensive
c. Available and fairly comprehensive
d. Not sure/don't know

Q12: Which of these components do you think OpenHPC includes? (Choose ALL that apply)
a. Provisioning tools
b. Resource management tools
c. I/O clients
d. Development tools
e. Scientific libraries
f. Cloud-bursting tools
g. Not sure/don't know

not sure where cloud-bursting came from. Perhaps augment with performance analysis tools and containerization tools?

Q13: Which of the same software tools is most important to you (or those you sell to)? (Choose ONLY ONE)
a. Provisioning tools
b. Resource management tools
c. I/O clients
d. Development tools
e. Scientific libraries
f. Cloud-bursting tools
g. Not sure/don't know

be consistent with changes to Q12

Q14: Which of these best fits the needs of your organization (or those you sell to)? (Choose ONLY ONE)
a. Free open-source cluster management software, not supported by a vendor
b. Paid open-source cluster management software, supported by a vendor
c. A vendor's non-open-source cluster management software
d. Other
e. Not sure/don't know

Hyperion Research – OpenHPC survey (draft)

Q15: Which factor is MOST IMPORTANT in a software distribution for your organization (or those you sell to)? (Choose ONLY ONE)

a. Ease of use
b. Functionality
c. Comprehensiveness
d. Affordability
e. Other
f. Not sure/don't know

Q16: Which type of user interface is preferred by your organization (or those you sell to)? (Choose ONLY ONE)

a. Command line interface
b. GUI
c. Not sure/don't know

Q17: How OFTEN does your organization (or those you sell to) customize software developed externally? (Choose ONLY ONE)

a. Always
b. Often
c. Seldom
d. Never
e. Not sure/don't know

do we gain much with these two Q's?

Q18: How HEAVILY does your organization (or those you sell to) customize software developed externally? (Choose ONLY ONE)

a. Very heavily
b. Moderately
c. Very lightly
d. Not at all
e. Not sure/don't know

Q19: What new release rate for cluster management software is preferred by your organization (or those you sell to)? (Choose ONLY ONE)

a. Once a year
b. Twice a year
c. Four times a year
d. No specific rate – whenever something important is added
e. Not sure/don't know

Q20: How does your organization (or those you sell to) prefer to engage with the HPC community? (Choose ONLY ONE)

a. Email
b. IM (instant messaging)
c. GitHub
d. Slack
e. Other
f. No single preference – it varies
g. Not sure/don't know

Hyperion Research – OpenHPC survey (draft)

- Thoughts/discussion?
  - initial draft does not seem to ask questions specific to existing users and their experience(s)
  - could suggest inclusion of questions specifically for users
  - potential q's to revisit based on our previous discussions

Q (users): How do you access OpenHPC builds?
Q (users): Rate your satisfaction with OpenHPC installation recipes?
Q (users): Rate your satisfaction with ability to perform upgrades with newer OpenHPC releases?
Q (users): Are you aware of or have you used:

- test-suite
- source RPMs
- binaries for multiple architectures
- mechanism to request additional software
- public email list
- containerization options

Q (general): How important is it to adopt/support the latest versions of upstream releases?
Q (general): Does your site prefer stateful of stateless provisioning
